DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a method of inactivating enveloped viruses, classified in class 435, subclass 236.
- II. Claims 13 and ¹⁴~~15~~, drawn to a method for preparing a viral preparation, classified in class 435, subclass 236.
- III. Claim ¹⁵~~14~~, drawn to a method of preparation, classified in class 435, subclass 239.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the different groups comprise different method steps. Group I requires solvent, temperature, and pH parameters that are not required by groups II or III. Group III requires different method steps harvesting virus from a cell culture preparation that is not required by groups I or II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shanon A. Foley whose telephone number is (703) 308-3983.

The examiner can normally be reached on 7:30-4:30 M-F.
